

What to bring
to the

ER

Make a list and take it with you to the emergency room and doctor visits.

- List of allergies to medications.
- List of all prescription, over-the-counter, herbal, birth-control and sexual-function (Viagra®, Cialis®, Levitra®, other) medications.
- Date of your last tetanus shot and other immunizations.
- If female, date of your last period.
- Any other past medical history (e.g., medical problems, surgical history).
- Another driver, if possible — if you receive pain medications or have any of a number of conditions, you won't be able to drive yourself home.

Newton Medical Center

Family friendly. First class.
